Spot the differences

THERE appears to be some confusion between duck shooting, recreational fishing and golf. Here are a few differences to help clarify. Recreational fishing and golf do not scare landholders' stock through fences on to roadways.

Recreational fishing and golf do not subject children and pets to mental anguish.

Recreational fishing and golf do not kill threatened species and anything else that gets in the way.

Recreational fishing and golf do not create noise pollution.

Recreational fishing and golf allow other peaceful recreational activities to continue in harmony.

Recreational fishing and golf do not destroy already fragile ecological systems.

Recreational fishing and golf are easily monitored and managed.

If you enjoy roast duck for dinner, perhaps you could make inquiries with your local delicatessen.
